Personal Profile

I am a passionate, collaborative and proactive person who has the desire to learn from others and to improve on mistakes and feedback that are given. The idea of working with others is an idea that I value, as sharing thoughts creates innovation and creativity. With a strong background in problem solving I have worked on challenging projects that test my understanding and knowledge in certain areas, which has allowed me to build applications that work in the real world. In areas I am not confident in, I have asked for help to ensure that I improve and work on things that I am weakest at. Having taken part in projects by myself and with others, I have also become used to difficult tasks and would enjoy new challenges that lie ahead. Your apprenticeship interests me the most and is something I will like to pursue and gain further experience in.

SKILLS

HTML | Css | JavaScript | React | Firebase | Redux | Shopify | Problem Solving | GitHub | Passionate | Collaborative | Fast Learner | Proactive | Organised |

EXPERIENCE

Wagamama— *Front of House Member*

August 2022 - PRESENT

- I have been able to work and communicate well when under pressure. As during lunch hours it gets very busy and being able to work well in these scenarios is important.
- I am also a fast learner as I had a week to train for the position before I was an official team member and I continue to learn through the online courses.

Modesty's Way— *Frontend Developer(Shopify)*

September 2023 - PRESENT(Volunteering)

- I self learnt how to build an ecommerce site with Shopify
- Worked closely with the founder, enabling me to grasp an understanding of other systems and get involved in different aspects of the business, such as marketing. This is really valuable as it give me opportunities to learn and ask questions to help me develop

Projects

AnimeLibrary — *HTML | Css | JavaScript | React | Redux | Firebase*

November 2023 - Working

- During this project I showed resilience as I ran into a roadblock where the fetched data from the API was not readable in frontend, as a result I researched about the problem and fixed the issue, the data was in object and had to be converted to array.
- This project helped improve my understanding of React and has made me a better programmer as I made reusable components and code in the project.

Tesla (Clone Website) — *HTML | Css | JavaScript | React | Redux | Firebase*

October 2023 - Finished

- In this project I was able to utilise and learnt Firebase for login and signup function allowing me to make a full stack application.
- This project also further improved my React knowledge and has given me a better understanding of Firebase.

Projects preview are visible on my Portfolio

EDUCATION

A-levels: London Academy of Excellence: 322 High St, London E15 1AJ

2021- 2023

Chemistry - B | Mathematics - B | Economics - B

GCSEs: Cumberland Community School; Oban Cl, London E13 8SJ

2016- 2021

English Literature - 8 | English Language - 8 | Mathethamics - 9 | Statistics - 9 | Geography - 9 | Computer Science - 8 | Religious Studies - 8 | Chemistry - 9 | Biology - 8 | Physics - 8 | French - 7 |

Personal Interest and Hobbies

Within my free time I love to do several activities, this includes gym and competitive swimming. Going to the gym acts as a stress relief for me and is a place of self improvement where I can work on the best of myself. I also competitively swim and have been since 2015 and have won several awards in and out of competitions, including a Jack Petchey for my hard work in swimming. In addition, I love building Lego and coding as both takes time to do and is challenging however through completing it grants high satisfaction.
